New office IT setup checklist

Moving or opening an office? Everything to sort out before day one, in the order it needs doing.

8 to 12 weeks before

- [ ] Internet service ordered (business NBN or fibre), with a backup link planned
- [ ] Site visit to check comms room, power, air flow and existing cabling
- [ ] Cabling plan drawn up with the builder before walls are closed
- [ ] Wi-Fi survey or heat map planned for the floor layout
- [ ] Phone system and number porting arranged

4 to 6 weeks before

- [ ] Network gear ordered: firewall, switches, access points, rack and UPS
- [ ] Meeting room screens, cameras and microphones chosen and ordered
- [ ] Printers, scanners and any door access or CCTV integration planned
- [ ] Security: separate networks for staff, guests and building devices

1 to 2 weeks before

- [ ] Internet service connected and tested at full speed
- [ ] Network built and configured; Wi-Fi tested in every room
- [ ] Desk setups labelled: docks, monitors, power and cables
- [ ] Move-weekend plan written: who moves what, in what order, and a rollback
- [ ] Staff told what to pack, what not to unplug, and where to sit

General guidance only, not formal advice. (E8) = related to the ACSC Essential Eight. (c) MSM Technologies.

New office IT setup checklist (continued)

Tick each item as you go. Anything unticked is a conversation worth having.

Move weekend and day one

- [ ] Full backup taken before anything is switched off
- [ ] Servers and network gear moved first, then tested before desks
- [ ] Every desk, printer and meeting room checked before staff arrive
- [ ] An engineer on site on day one for quick fixes

After the move

- [ ] Old site internet and phone services cancelled (but not too early)
- [ ] Old equipment wiped and recycled responsibly
- [ ] Network documentation and passwords updated and stored safely

Notes and next steps

Who owns each unticked item, and by when?
